

Innovate Government Services with
BLOCKCHAIN
Technology

Janice Tsui
Systems Manager
Dec 2019

Office of the Government Chief Information Officer
The Government of the Hong Kong Special Administrative Region

Blockchain = “Disruptive” Technology?

- What does it mean to the Government and public services?
- Can it bring benefits to the Government?
- Any issues (such as performance, security, scalability, sustainability, etc.)?
- Are we ready for this technology NOW?

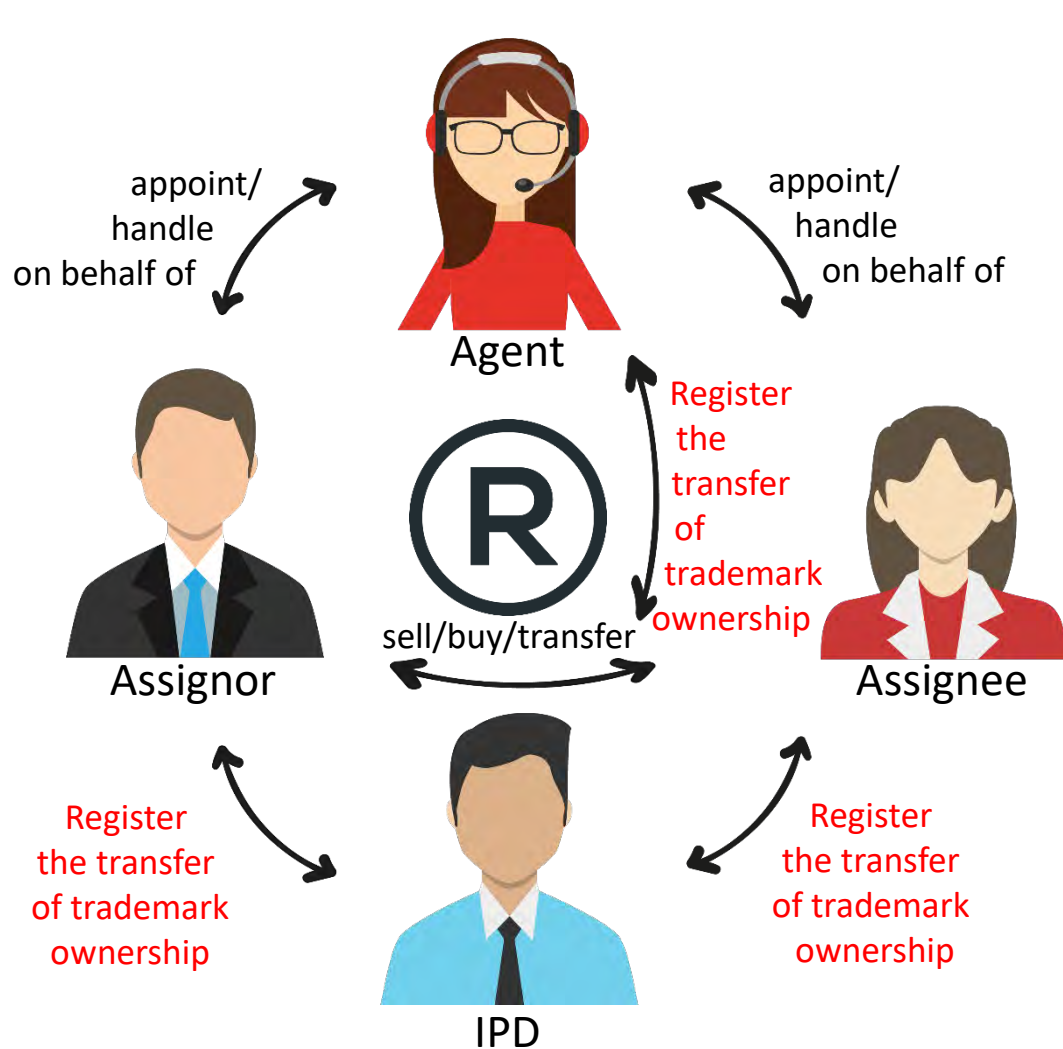

PILOT BLOCKCHAIN PROJECT

- Explore applicability
- Assess potential benefits
- Ascertain feasibility
- Address interoperability
- Formulate development roadmap
- Formulate roadmap for full scale production rollout
- Share experiences

Transfer of Trademark Ownership

Intellectual Property Department

vs

Traceability of Pharmaceutical Products

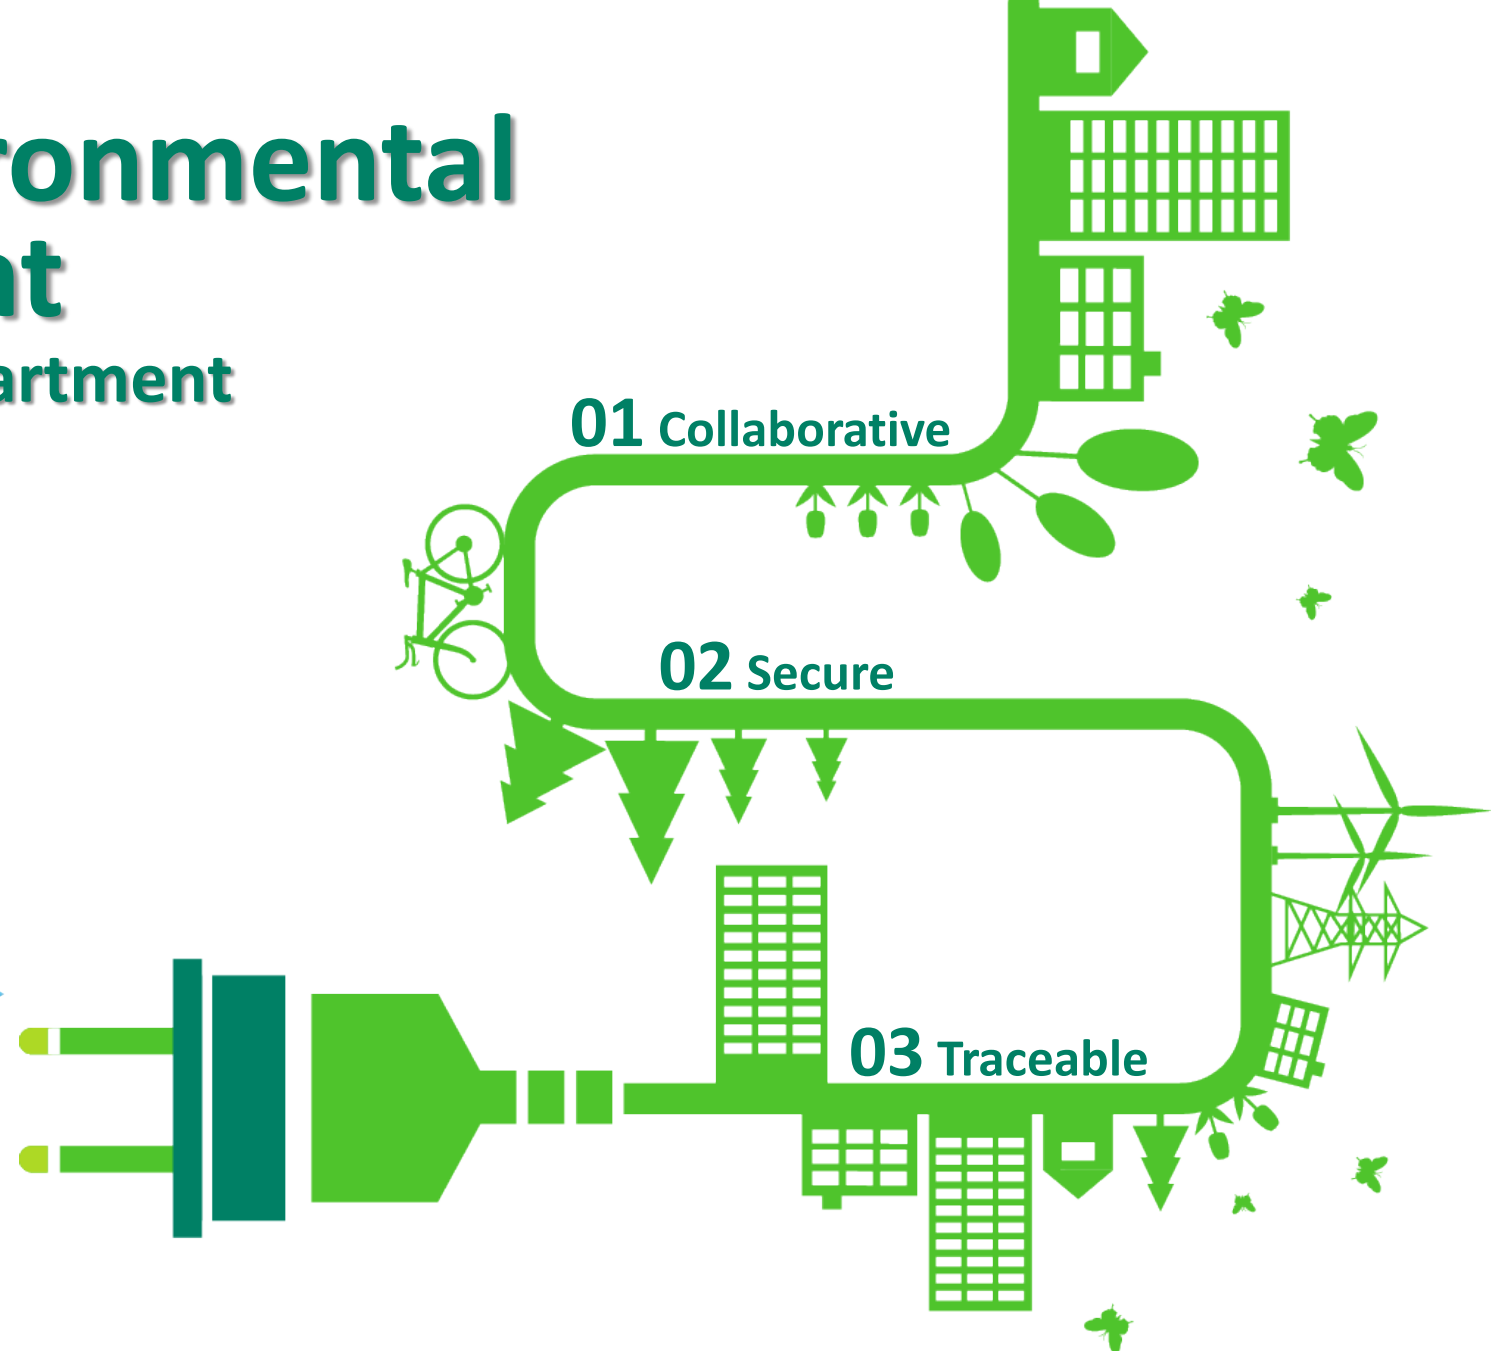

Department of Health

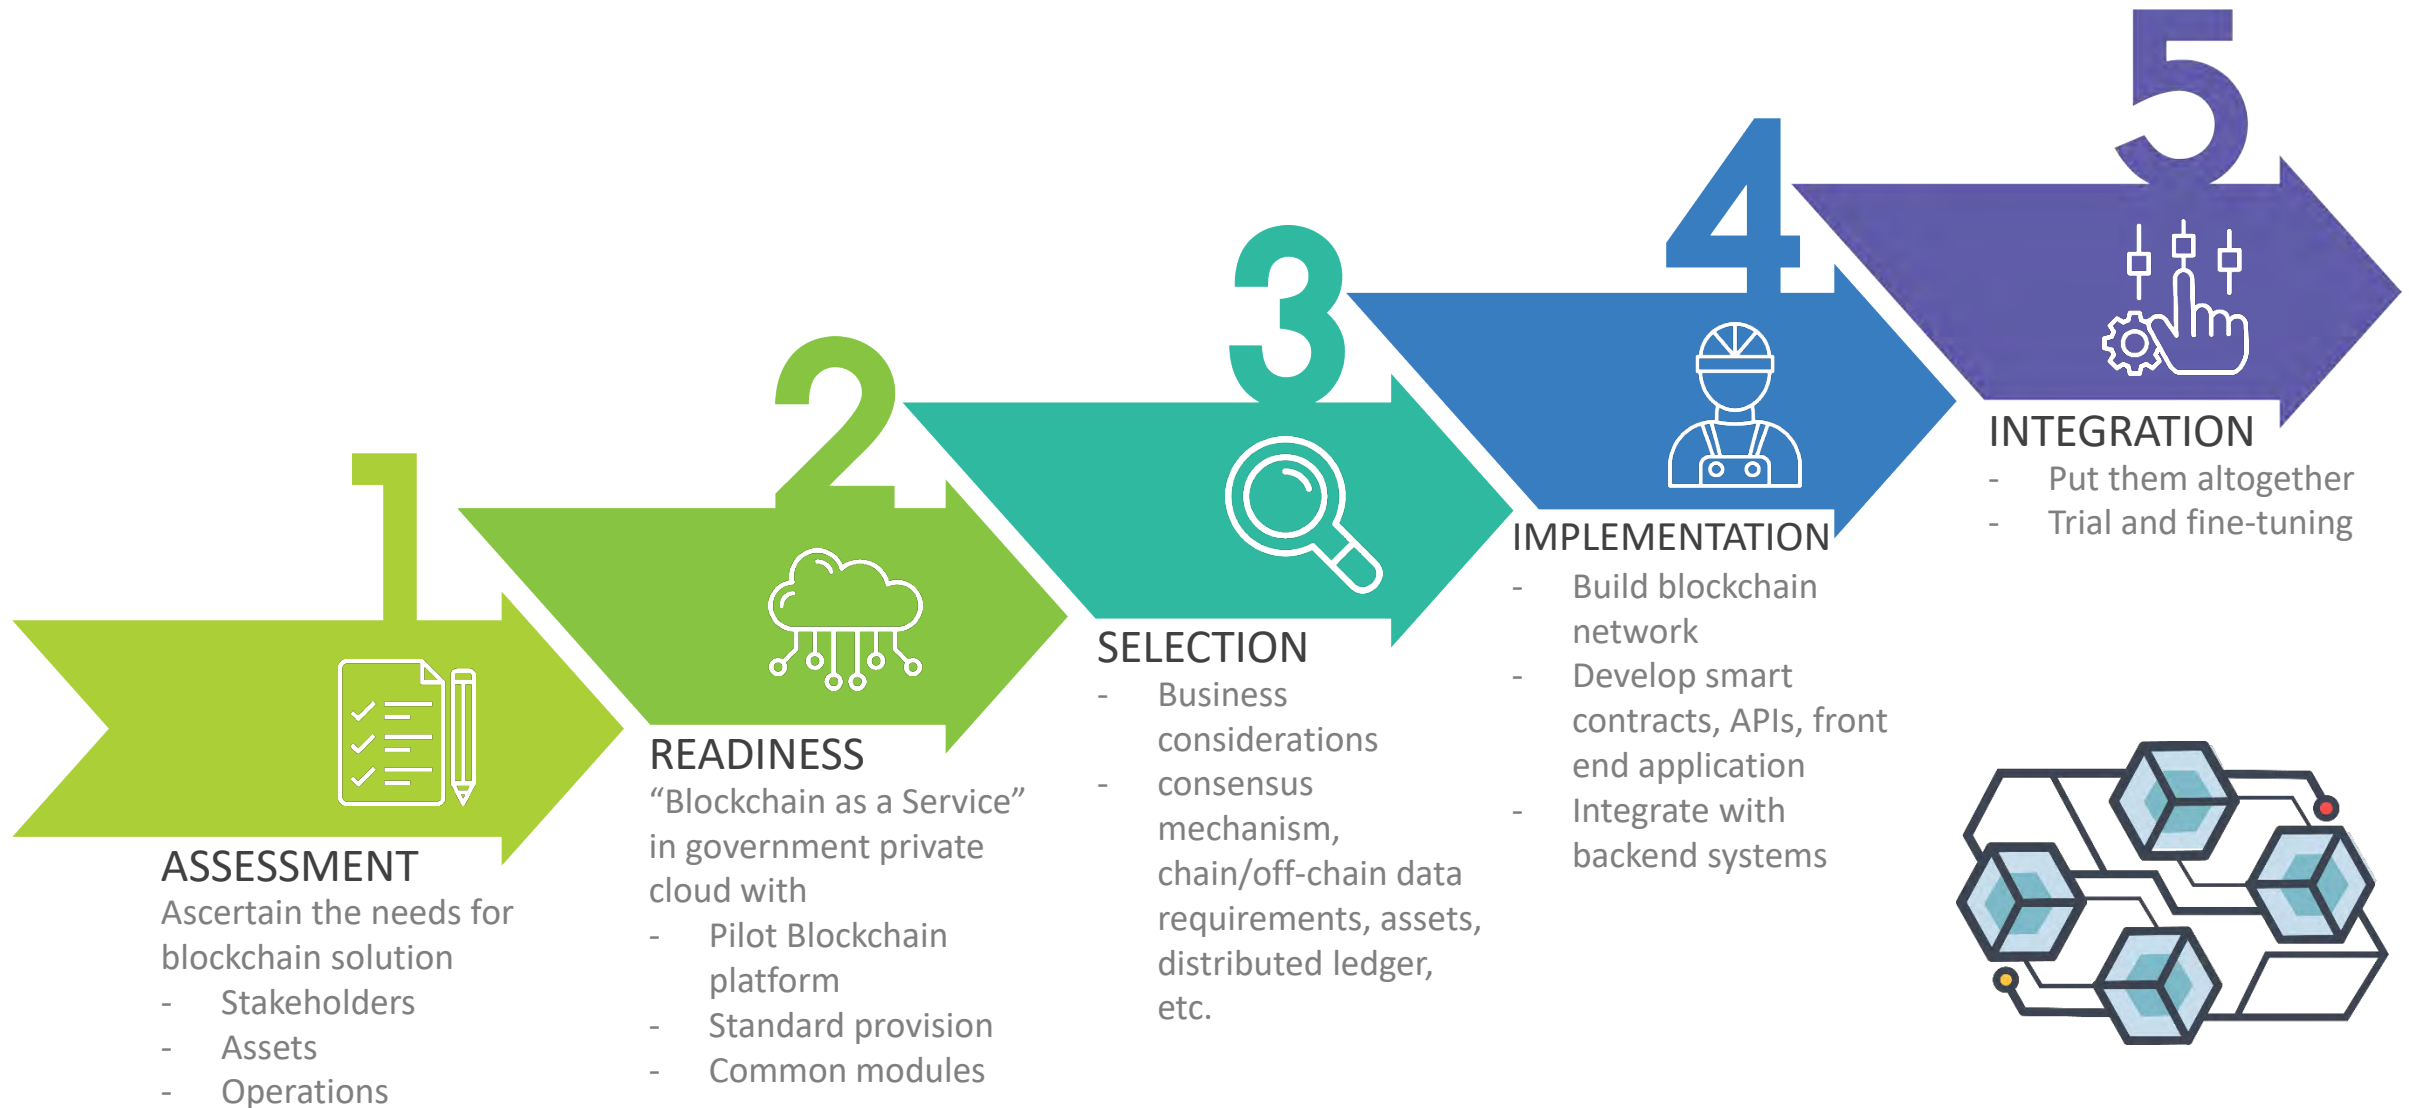

- Identify sectorial patterns and seasonal patterns on supply of medicines
- Provide timely logistic information
- Facilitate efficient and effective recalls
- Provide useful information for healthcare professional and general public

Streamlining Environmental Impact Assessment

Environmental Protection Department

Building Pilot Blockchain Applications

Use cases having potential to adopt blockchain

Blockchain is good for you?

Business or processes spanning across external & multiple parties

Clearly defined assets; shared, distributed and tamper-proof data store

Auditable & timestamped historical transactions

Prolonged processing time due to intermediaries

Not having high transaction rate and no need for real-time response

Licences & Permit

Registration

Certificates

Supply Chain

Welcome to explore **YOUR** potential use cases with us

Evaluate pilot results

Share pilot experiences

Devise deployment roadmap

Think big + Start small

Thank
you
