### Joy Aether Limited 喜悅導體有限公司

[www.joyaether.com](http://www.joyaether.com)

Joy Aether is a leading mobile solutions provider, focusing on the design and development of business mobile and web application software. Our customer base includes multinational corporations like Pfizer, UBM, DBS Bank, etc.

We create award-winning apps that our customers receive awards in the areas of smartphone apps and digital channels, in Hong Kong and overseas. Media outlets such as local ones like TVB, Apple Daily, and international ones like Bloomberg TV have interviewed us about AR (Augmented Reality) technology, IoT, and mobile solutions.

#### 1. Notification module via WeChat

#### 2. AR Visualization

During the pandemic, the flow of people in HK-China people in all walks of life are severely impacted. Also, many need to work remotely, further impacting communications. For example, some cannot have proper access of the full IT systems that they have when they were in the office. Therefore, we have developed a module that can be integrated onto an existing IT system, to notify important messages / selectively notify with security and message sensitivity in mind.

AR Visualization – be there without being there.

Using AR as a visualization tool, we are currently applying to different usages:

##### 1) Home Learning.

Project 3D materials to carry out interactive AR learning. There could be X topics, each topic has Y interactive objects.

##### 2) Leisure Travel – Points of Interests.

By applying mobile to introduce content at Point Of Interest (POI) using location based information and AR, we expect to enhance and extend the user experience on location and further interact remotely.

##### 3) Product Visualization

3D view, and use AR to visualize in your home / on your desk, before you buy through shop or ecommerce.

### LeapXpert

[www.leap.expert](http://www.leap.expert)

LeapXpert focuses on making an easy to use, yet technologically sophisticated Federated Messaging Orchestration Platform (FMOP™), an omnichannel B2C messaging platform for financial institutions, law firms, accounting firms, insurance companies, and corporates who wants to gain control of the communication between their employees and external clients for visibility, accountability, compliance and analytical reasons. The messaging platform has enterprise-grade security, integrating with all popular social messaging APPs on mobile and web, and existing internal communication and collaboration platforms.

#### LeapXpert FMOP™

LeapXpert FMOP™ is a B2C Federated Messaging Orchestration Platform. FMOP is an innovative concept, that elevates messaging between company employees and clients (individuals or B2C/B2B companies), to a formal business communication channel, similar to calling or emailing. FMOP solves compliance communication issues which allows banking institutions to communicate with their customers via all popular social messaging APPs on mobile and web, and integrate with banks' existing internal communication and collaboration platforms, social communication Apps as well as supporting the normal functions of the daily banking business.

### Unisoft Technology Co. Ltd. 紫晟科技有限公司

[www.inas.online](http://www.inas.online)

Founded in 2016 by a team of distinguished scholars and serial entrepreneurs, Unisoft Technology Co. Ltd. is named by Gartner 'the notable player in the emerging Intelligent Infrastructure market'. Our vision is to build a most secure infrastructure supporting interoperability of all existing cloud-based data hubs with Network Coding Technology.

Our flagship product, iNAS and nCloud Datahub could be offered as a DaaS (Data-as-a-Service) solution. It enables interoperability of all public cloud vendors with highest-grade security and geo-distribution. With the geo-mapping and support of our three strategic partners: Cyberport, HKSTP, and HGC, we have secured more than 300 institutional clients year to date. We were recently awarded a US\$ 3million grant by the Chinese Academy of Sciences to replicate the successful business model in the Greater Bay Area.

#### 1. iNAS

#### 2. nCloud Datahub

The iNAS system Cyberport community startup Unisoft has installed for 300 SME companies is a revolutionary file managing platform adopting university-invented networking coding technology. The service greatly improves data security and storage reliability, while at the same time providing streamlined management from filing, and emailing to scanning.
