Key Values

TeamNote is a collaboration platform designed for hybrid work and remote work needs. It offers secure communication, data management, and flexible system integration. Users can create chat rooms, share news, and upload/share files for improved collaboration and resource accessibility.

1

Communication & Collaboration

Skip the step of saving employee contacts on your personal phone. Start chatting with the right employees directly by searching their department, title, or name.

- User Profile
- Employee ID e-card
- Contact Import by Excel
- Active Directory (AD) Synchronization

2

Employee Engagement

Reach every employee with relevant content through appropriate channels that are more than just chat rooms. Keep everyone engaged, motivated and up-to-date with changes.

- Employee's Benefits
- Notification
- Poll Feature
- Training System Integration
- Shared Documents
- Human Resource System Integration
- Questionnaire
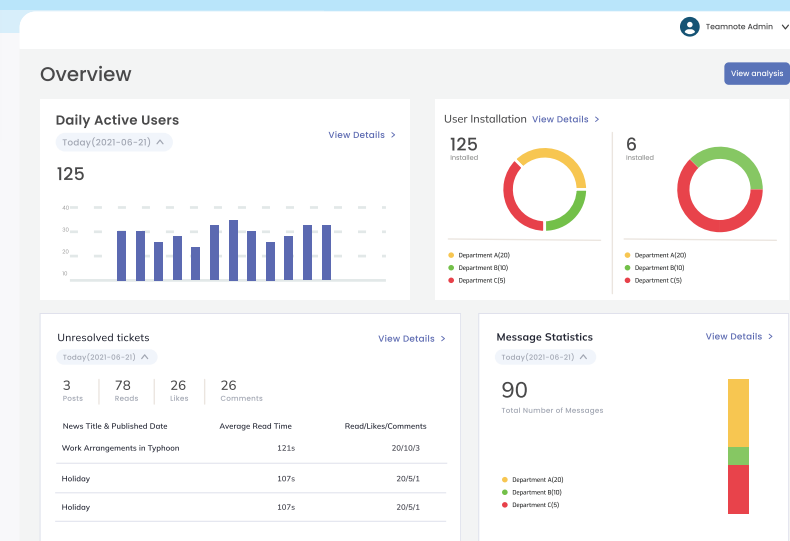

3

Data Security and Protection

Data confidentiality and ownership are crucial for any business. TeamNote provides multiple hosting options, including on-premise servers, cloud hosting, and Software-as-a-Service (SaaS), to ensure the secure transmission of files and information.

- Watermark
- Password-Protected Messages
- Flexible System Hosting Options
- Multi-Factor Authentication
- Biometric Authentication
- Industry-Standard AES 256-Bit Encryption

Admin Panel

Dynamic accessibility control for different user groups. No matter if you are a project coordinator, end-users or admin, stay connected and informed with relevant content.

- Access Control And Permission Management
- Track Activities With Audit Trail
- Unify Business Analytics
- Get Actionable Insights Through Dashboard

4

Super-Connector :System Integration

Unified the legacy and new systems into a single platform to achieve **all-in-one** virtual working experience. Enabled seamless access to necessary and designated information through effortless Single Sign-on (SSO).
