# Technologies Evolution

## 1G

- AMPS
- Analog based
- Basic Voice service
- 2.4Kb/s
- 1981

## 2G

- GSM, CDMA
- Digital
- Designed for Voice
- Full Coverage
- Low Cost
- 64kb/s
- 1991

## 3G

- WCDMA
- Voice & Data
- Broadband
- 2Mb/s
- 300ms
- 2001
- Internet
- iPhone 2007
- IoT data 2008

## 4G

- LTE
- NB-IoT
- Data & Voice
- IP v6
- 100Mb/s
- 40ms
- IoT info
- 2011

## 5G

- 1Gb/s
- 10ms
- Big Data
- AI
- IoT wisdom
- Real time
- Smart Factories
- Smart Transportation

# IoT and 5G

**IoT Device:** any device that is able to communicate with each other or the internet

**IoT Network** creates an intelligent

>90% not connected

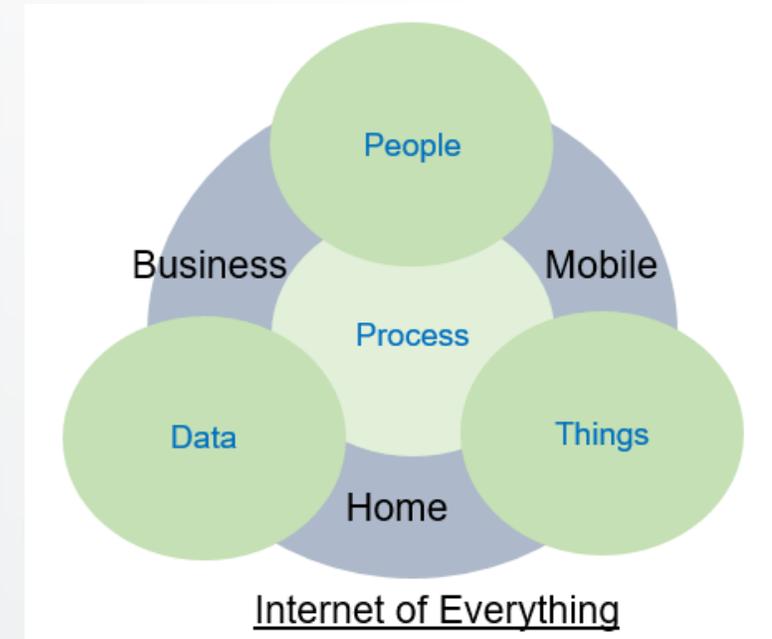

## Artificial Intelligence

Devices collect and process data  
make decision and act on that data without  
involvement by human

## Cloud Computing w/ 5G connectivity

- Low energy
- High density
- High capacity
- High data rate
- Strong security
- High latency
- Big Data
- Data Analytic
- Model, Pattern, Prediction

**Unleash cloud computing, AI, human intelligent**

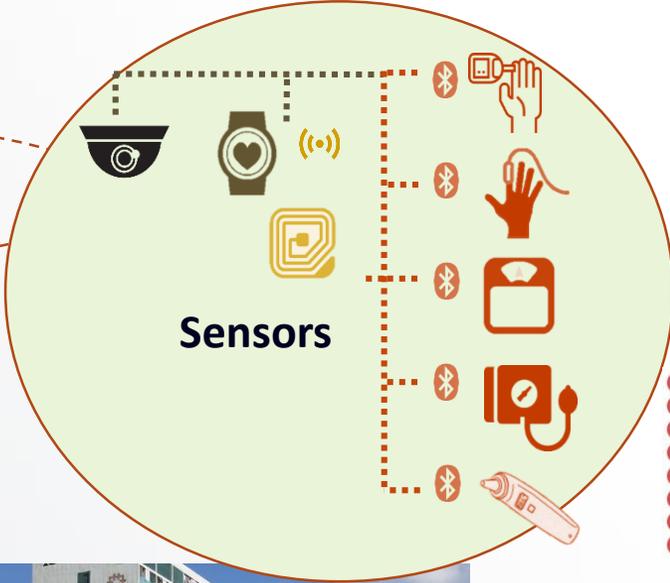

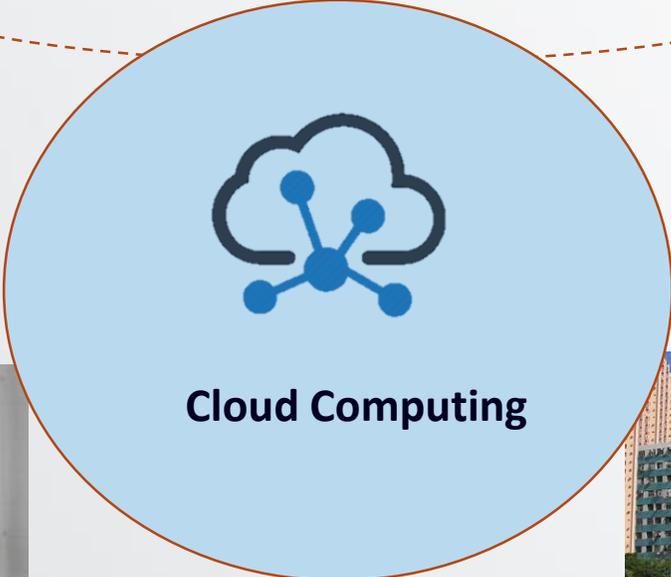

# 5G Use Cases

<b>Smart Farming</b>	Autonomous trucks, sensors
<b>Digitized Education</b>	AR, VR
<b>Connected Healthcare</b>	Real time diagnosis and treatment of patients everywhere AI ability to assist with data processing and analytics mean more accurate modelling
<b>Smart Factories</b>	Predictive maintenance
<b>Connected Smart Cities</b>	Smart Street Lamp, Smart Prison
<b>Better Venue experience</b>	Smart ticketing, indoor navigation, smart parking, autonomous ride share
<b>Smart logistics at container ports</b>	Autonomous trucks
<b>Smart Airport</b>	Asset tracking, autonomous luggage vehicles, passenger assistance, gate boarding pass
<b>Smart Transportation</b>	Pedestrian safety warning, smart lighting, smart parking, truck platooning, Vehicle telematics, Infotainment
<b>Public Safety</b>	Real time video, secure communications

# Connected Healthcare

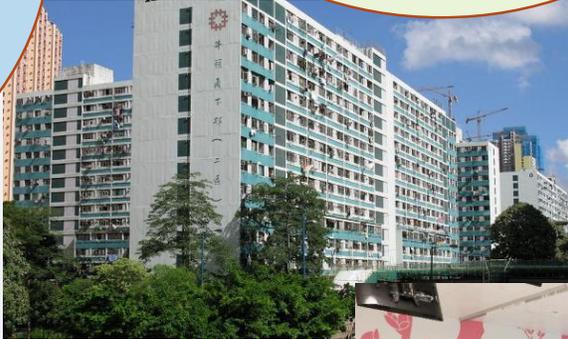

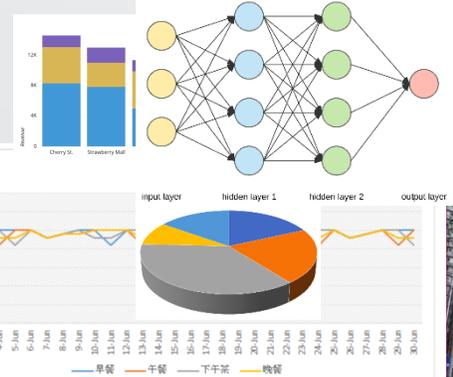

- Professionals
- Monitor centre
- Caregivers
- Family

- One press SOS
- Fall Alert sensor
- Positioning (GPS/Wifi/LBS)
- Geo-Fence (Circle/Polygon)
- Heart rate monitoring
- Activity monitoring
- Voice menu/ Voice control
- Two ways voice call

consultations

- Ageing in Place
- Elderly Home
- Medical Centre
- Community Centre

# Autonomous Vehicle Development Platform

# Teleoperations for Autonomous Driving via 5G

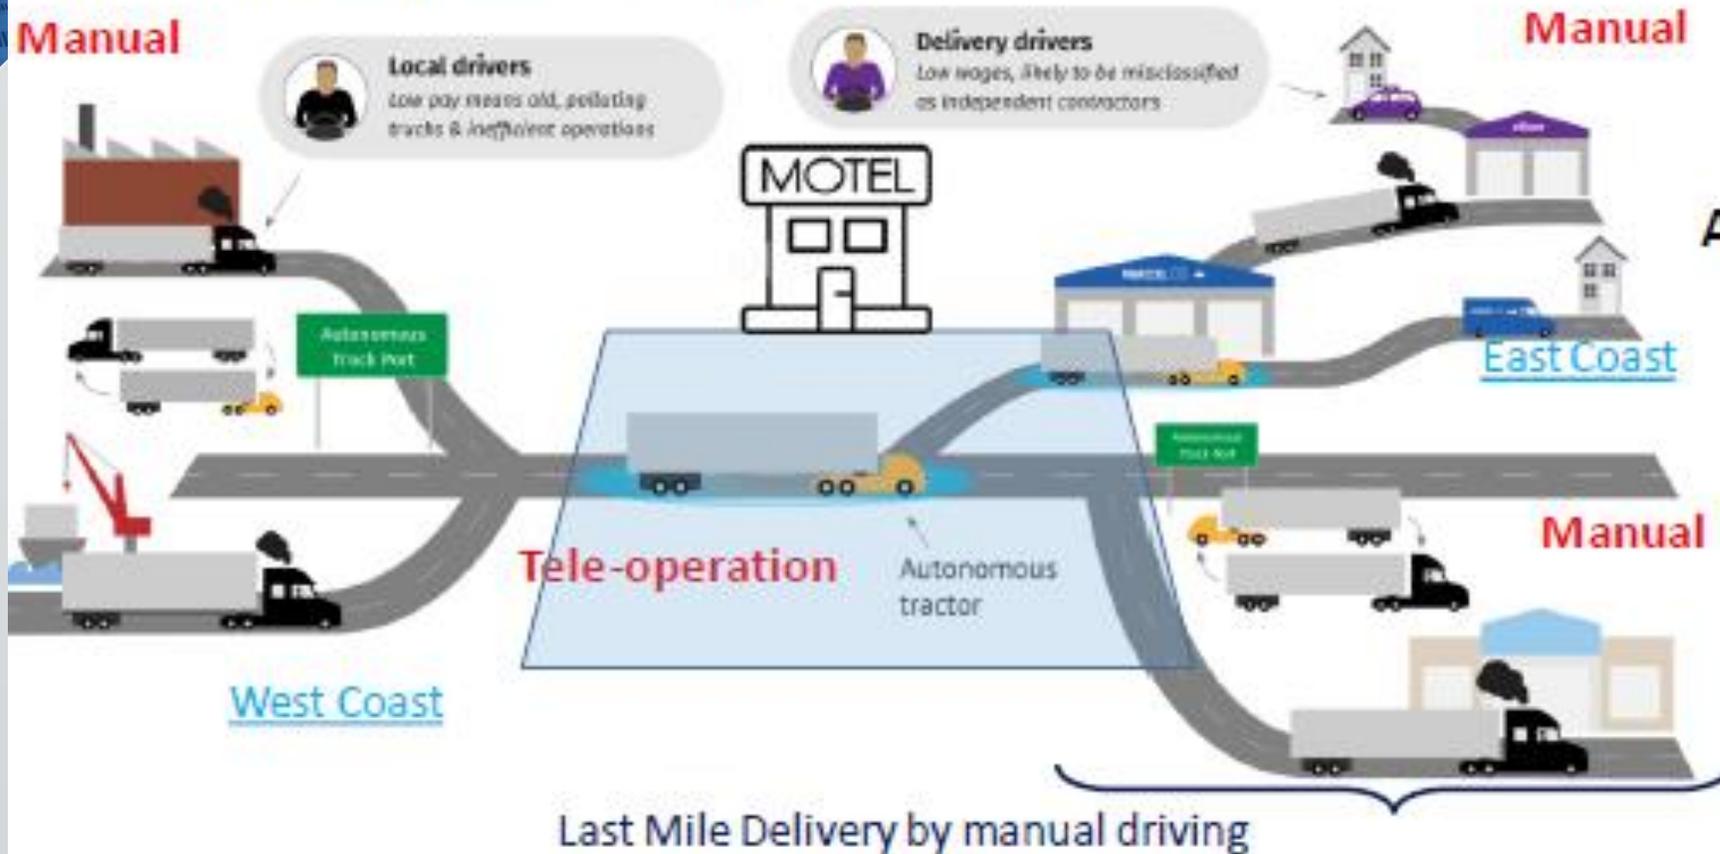

- Real-time HD front video streaming
  - Steering control
  - Brake control
  - Throttle control
- } Drive-by-Wire (DbW)

# Teleoperations for Autonomous Driving via 5G

Last Mile for L4/L5 autonomous or teleoperated driving in highways  
(e.g. US east coast – west coast)

**Manual**

- Long hours of isolation far away from home
- High turnover & a shortage of drivers

**Autonomous + Teleoperation**

- Centralized control centers
- Home driving

# Platooning Operations for Fleet Vehicles

## Full-Scale Autonomous Truck Platooning Operations

- Lead truck + 3 trucks autonomously driven
- Precise docking / undocking of cargo
- Save lives & decrease environmental impact
- Fuel savings and increased road safety

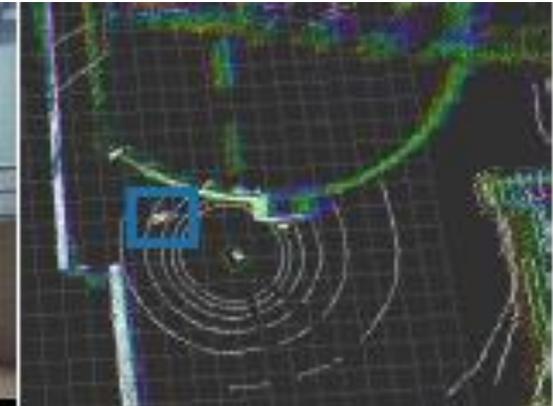

- Lv.4 driverless with Safety
- Fuel savings 7% (4.5% lead truck, 10% for followings)
- Intelligent pairing by Network Operations Cloud (NOC)
- Teamwork

# Low Speed Autonomous Mobility – Mini Mover

- Capable of moving to destination autonomously
- Plan suitable path with collision avoidance by A.I. and sensor fusion technologies
- Perform short distance delivery tasks in a less labour intensive way

Object recognition with distance estimation

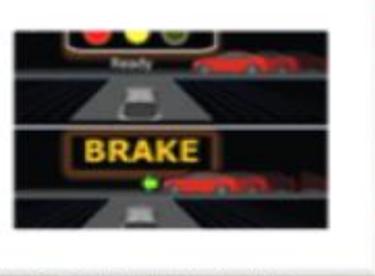

LiDAR - Simultaneous Localisation And Mapping (SLAM)

New version

# 5.9G Hz band for ITS applications

V2I (traffic lights)

V2P (vulnerable road user)

V2V Safety

# HKPC 5G IoT

## 推「5G應用平台」供測試自動駕駛

產力局汽車零部件研發中心總經理潘志健（左）說。研發中心新推……（朱安妮攝）

【訊】5G網絡今年4月陸續推出，政府為鼓勵各界及早使用技術以推動創新和智慧城市，透過第二輪「防疫抗疫基金」推出「5G技術資助計劃」，每個項目上限資助50萬元。產力局於旗下的汽車科技研發中心推出「5G應用測試平台」，提供測試專用的5G室內外場地、小型自動駕駛平台等，冀與5G應用的開發商合作開展研發項目。

汽車科技研發中心總經理潘志健表示，自去年中已開始籌備「5G應用測試平台」，今年5月初正式推出，現與中國移動合作，於佔地約1.3萬平方呎地方安裝3.5吉赫5G網絡，包括
